

Each Construction site needs its own input and output
when adding an input it should be added in the construction site table
same the output each output is for a construction site

As referred in the page below,
the page DATA SUMMMARY is a page where we can see ALL the INPUTS of
EACH construction site
and
ALL the OUPUTS for each construction site

INPUTS CONSTRUCTION SITE 1		
DATE		
CATEGORY

EXPORT

I have seen that the export button were not added,please add them it is a button so that the tables can be exported into EXCEL or XLS format

page display

Dashboard for Construction Site 1							
Category	Reference	Product	Stock State	Stock Level Security	Stock Input	Stock Output	Final Stock

table that should be displayed in every construction site page

I have seen that the export button were not added,please add them it is a button so that the tables can be exported into EXCEL or XLS format

EXPLANATION FOR DASHBOARD TABLE

Final Stock = Input - Output

Stock Level Security = 10% of quantity received

If Final stock < Stock level security then **Stock State** = *Satisfactory level*

If Final stock > Stock level security then **Stock State** = *Resupply*

DATABASE BREAKDOWN(CORRECTED)
